

Utah Critical Path Regional Haze SIP

2006			2007			
Q2	Q3	Q4	Q1	Q2	Q3	Q4
Complete 2002 and 2018 base year/base case modeling and causes of haze analysis (WRAP)						
	CALPUFF for BART analysis (WRAP)					
		Engineering analysis for subject-to-BART sources				
	MOU with PacifiCorp					
Develop TSS (WRAP) and analyze state by state impact (Utah)						
	2002-2018 source apportionment (WRAP)					
Preparation of Utah TSD						
SSJF -- SO2 Milestones and trading rule						
Review of Model Performance Evaluation for Class I Areas in Utah and adjacent states						
Was 2002 Average? Meteorology (WRAP) and inventory (Utah)						
	Consult with Utah stakeholders					
			Consult with tribes			
				Consult with FLMS*		
		Determine additional control strategies for non-BART sources				
			Consult with other states ** - establish reasonable progress goals - agree on criteria for reasonableness - exchange detailed control strategy information			
			Draft SIP and rules			
				Revise SIP and rules based on consultations and comments		
					AQB propose SIP, rules for public comment	
						Submit SIP and rules to EPA

* Draft SIP and rules will be available for review on Utah's web site approximately April 1, 2007.

** Utah is ready to consult with other states anytime they are, but it is likely that consultation will be most productive after all states complete their BART determinations.
